water. The Allied headquarters in Naples. It was announced today that Allied bombers blasted the big port of Naples last night after a fleet of more than 500 heavy bombers rained explosives and incendiary bombs on the city and targets in northern Italy. The night bombers also blasted targets in the Sicilian cities of Palermo and Messina (Legaorn) and struck at Monfalcone, near the Adriatic port of Trieste.

Bombers also hit yesterday by American planes during dawn-to-dusk attacks a variety of targets vital to the German war effort. Preparations, including at least eight raids in northern and central France.

Night blows brought to an end the run of daylight attacks on the Ruhr and Rhine March 3 and April 1, when B-24 bombers and A-24

It is known, however, that the island was taken by the U.S. Marine Gen. Kreipe, who before his promotion to this rank last September, was the commanding officer.

Earlier today Cairo radio broadcast: "We are informed from trustworthy sources that the commander of the Japanese garrison on Crete is no longer on the island. He was captured by British officers who withdrew to help from the Cretan population."

The broadcast gave the name of the Japanese commander as Gen. Burg, but did not disclose how he was captured.

London, May 1 (AP)—The Soviet government newspaper, *Izvestia*, suggested today that the hail on the Russian front, attributed to weather and Red Army regroupings, would end soon and that a new offensive would burst on the Germans "with the force of a hurricane."

The Germans are now "trying to guess where the next blow will fall," the newspaper declared as a Soviet communique reported that the lance from Hull had entered its second week without any important changes.

'There She Goes' Shouts Crew Of Canadian Boat as Blazing Nazi Destroyer Sinks to Bottom

Fired Guns Continuously for Two Hours Before Ship Out of Action

US SHIPMOCK SCREEN BY LIESCHER

OTTAWA, April 30.—(CP Cable.)

Aboard *REACH*, Haida at 100, 40 ft in the air over the water. We were watching an enemy destroyer sink. A half-hour ago she had been a blazing wreck but now a few moments ago her guns still were spitting deadly shells.

"There she goes," someone shouts as we watch the blazing enemy ship sink and slides under the water in the air over the water. Flares of battle and smoke are seen in the air over the water. The lead, some batteries are firing until they are out of action.

Let's not kid ourselves

Are you still a wishful thinker?

SURE, we're winning—but we haven't won yet.

Victory will not fall into our hands like a ripe plum.

Are we letting recent successes go to our heads—forgetting that the greatest battle has yet to be won?

Here are recent statements by our leaders which show that they are not doing any wishful thinking:

KT. HON. WINSTON CHURCHILL—"This is a time for preparation, action and resolve. I have never taken the view that the war in Europe is at hand... and I have certainly given no guarantee or even held out any expectation that the year 1944 will see the end of the European war, nor have I given any guarantee the other way."

RT. HON. W. L. MACKENZIE KING—"I wish to repeat that we are in a situation that are very grave indeed... and we are heading rapidly into a situation which will be the most desperate this world has known."

HON. J. L. RALSTON—"There is not much evidence that German military power has decreased... Germany has shown herself able to stand prodigious losses."

"I hope I can make this country realize just what we have ahead of us. It is true that good news has been coming, but remember that if that good news is to continue it can only be by continuous contribution of the noblest price which the men and women of the forces and the homes they come from pay, and only if we are willing to make our contribution in self-discipline and self-denial words of theirs."

In these statements there is certainly no place for wishful thinking. They are a call to a greater effort to win that victory which must be won.

Bomb Destruction

In sixteen days of bombing of the Reich and Nazi-held Europe, more than 49,000 Allied airplanes have swept over with their devastating bombs, estimated at 75,000 tons. 830 Nazi planes were destroyed, the Allies losing 614. Figures are of course approximate only.

What this weight of bombs must mean to German war effort and to the havoc of the enemy war machine cannot be realized. Such heavy bombing must be so many more times effective than the damage done when large raids can cause.

The stepping up of the raids has been one of the phenomena of this spring and recalls the predictions of Allied groups a couple of years ago. Today these predictions have been surpassed. And the end of the growth of Hitler's might and the demonstration of this power is not yet in sight in the opinion of some observers.

Month of Paint Brush

May is the month of the paint brush. A splash of soap and water, followed by a little paint, will work wonders in an old room, on back stairs, up in the attic. And the job you do yourself is the job most enjoyed.

The month is springtime, the time when dark clouds disperse their winter's accumulation of odds and ends, put away for winter's habitation. It is the time after day through the winter months. With the job of spring cleaning well started, the house takes on a new and fresh atmosphere almost forgotten since the last year's spring cleaning it got. Curious and faded colors are washed out of the winter smoke and dust and freshen up the whole house by their crisp, fresh whiteness. Carpets are washed and scrubbed, the windows are dirt and dust and half-forgotten patterns are again seen with colors restored to their original brightness.

At the end of paint spread over dim surfaces of woodwork has a way of making life seem better, taking a new lease of life. It is a month when the professional job, the real pleasure comes from stepping back and surveying the work done with the eye of a creator, and no artist can take more pride in his finished work than does the amateur house painter.

The exterior work of any professional painter, it doesn't really matter whether the mixture is quite up to the correct consistency, it is more important to get the paint on the house, or on the window frames, or on the floor. There is joy in getting the paint brush and roller and new cans of fresh paint, and there is no newness of the year better suited for the job than May.

Victory Gardens

Victory gardens in Belleville will take on an importance which is not only the food that can be grown by Canada will be needed to feed the Allied armies, the liberators, but the victory gardens of those who live here in Canada. Food is about to become one of the major items when the campaign of Europe goes on.

Nation said an army "marches on its stomach."

The Allied armies will be many times as much from Napoleon ever dreamed of and many times more food will be needed to feed them than he ever thought of, while there is the additional responsibility of feeding the peoples of the countries taken back from the Germans. This makes the small victory garden more important than ever this year.

With thousands of Canadians growing vegetables in their own back yards, in victory garden plots on vacant lots, much more food from the agriculture and home and farm will be released to the canning factories for shipment to our armed forces and prepared against the Soviet responsibility for the war. It is estimated how much food will be secured.

The collapse of Germany, if it were to happen, would mean that the Allies must feed almost all of the European continent, including the Polish otherwise riots and revolt with serious trouble might be expected. Therefore, food will play an important part in the peace as in the war. The "yard-garden" role may be small, but such contributions as he will make to the relief of food markets will help Belleville victory gardens in the service

with only a small amount of labor, water and care, small in comparison to their loss.

Abahabank's Loss

Canadians will feel sorrow at the loss of the Canadian "Tribal" class destroyer H.M.C.S. Abahabank, which sank as it was pursuing two German destroyers, at the western end of the English Channel. Her companion ship the Haida which was likewise pursuing the enemy craft, drove one in flames aboard on the French coast and she was wrecked on the Abahabank's sinking. The Haida then rescued 46 of the survivors of the Abahabank and the Germans later rescued 100. 85 survivors in the normal crew was 223 men.

The Abahabank when first hit kept fighting at the enemy, guns thundering as the flames spread and the ship steamed on, only to receive another shell which slowed her up.

This destroyer had had a fine record in pursuit of enemy ships and had a part in the battle with the Nazi Scharnhorst. She had been torpedoed some time ago and was laid up.

When Greatness Passes By

One hundred years from now, and later, people will probably say, "How wonderful it must have been to have lived at the time when man first flew like a bird in a heavier-than-air machine, and how did people feel when they saw one of the Wright brothers pass by on the street, just like any ordinary person? It must have been the feeling of Christopher Columbus pass by, or Galileo or Newton."

The appropriate comment on this would be that when people in their time, Columbus or Galileo or Newton walk down the street on ordinary occasions they feel how they do about the Wright brothers, who they were not excited in the least, though they knew that they were in the presence of one of the greatest figures of all time. They probably said, "Good morning, signor Galileo, or Senor Admiral, or Mr. Newton, it's a pleasure to see you. These who know may say that there is now living in Princeton a man as eminent as Newton in the past, the little girl who is called, "Good morning, Mr. Einstein," and he says "Good morning, my dear; how do you like this lovely morning, and that's the story about the philosopher Kant is that he was popular with his fellow-townsmen that he excelled greatly in dress and his habits that people set their clocks by him.

Looking Ahead in Ottawa

By the Ottawa Staff of The Canadian Press (Ottawa, May 2, C.P.). The forthcoming government housing legislation designed to increase the number of Canadian homes is not likely to be seriously hampered by absenteeism in recent months, although it will be a considerable relief to the thousands of workers in the construction industry who are now unemployed.

The sign of the times, however, is the recent Prime Minister's statement that the government is not likely to be seriously hampered by absenteeism in recent months, although it will be a considerable relief to the thousands of workers in the construction industry who are now unemployed.

VANCOUVER CADET HOPE TO FOLLOW FAMOUS AIR ACE

CHINESE-Canadian Lady
Story Reveals That
Bess Bunting Trained
Down Five Years Ago

Vancouver, May 3. (CP)—A Chinese-Canadian youth group is planning to follow the footsteps of the famous air ace, Bess Bunting, who was shot down in the Pacific during the war. The group is planning to fly a biplane over the city and land it in the water, just as Bess did when she was shot down in the Pacific.

Composed of two flights, this is the only air cadet squadron in Canada exclusively for working boys. The boys have been training since a week and drill during morning hours. They have been training in the use of the biplane, and the boys are now able to fly it. The boys are now able to fly it, and the boys are now able to fly it.

One flight of the squadron is made up of Vancouver-born cadets. The other flight is made up of Chinese-Canadian cadets. The boys are now able to fly it, and the boys are now able to fly it. The boys are now able to fly it, and the boys are now able to fly it.

It was then that Bess went to the United States. She was then a young girl, and she was then a young girl. She was then a young girl, and she was then a young girl. She was then a young girl, and she was then a young girl.

Modern Batting Record Tied By George Myatt of Senators In One of Two Games Played

Jim Robin Takes Record in 15 Runs Scoreless Victory
In One of Two Games Played

BY JACK MADON
Associated Press Special Writer

Two hits, no run, no error today in the first game of the series between the Senators and the Yankees at Washington. The Senators won 15-0 in the first game, tying the modern batting record set by George Myatt of the Senators in 1912.

There may not be any connection between the two games, but the record is a record. The Senators won 15-0 in the first game, tying the modern batting record set by George Myatt of the Senators in 1912.

George Myatt, Senators' equalizer, led the team record with a hit in each of the 15 games.

Mitchell, Diefenbaker Stand By Varying Figures on Missing Trainees in Debate in House

Labour Minister Says Number is 40,000 and Diefenbaker Says 350,000 Men

MANPOWER DEBATE

By DAVID COOPER From Staff Writer

Ottawa, May 3 (CP)—The Commons sitting ended yesterday with Labour Minister Mitchell and Mr. O. Diefenbaker (PC-Kan.) continuing to vary widely on the number of men in the military training camps who are still unaccounted for.

Mr. Mitchell said the number of men unaccounted for ranged from 18 in Charlottetown, P.E.I., to 12,000 in Montreal district, and totaled 40,000.

Mr. Diefenbaker said 350,000 men were "missing" after having failed to report for medical examinations under National Insurance Mobilization Act regulations. This figure actually was low, Mr. Diefenbaker said, because 21,000 men had failed to report after being called for military duty.

YOU'RE GOING TO PAINT!

FOLLOW THESE SIMPLE RULES:-

Outside Painting

Be sure the surface is dry; let the sun or wind dry it out after a rain. Remove dirt from corners, putty up any cracks and holes. Don't lay the paint on too thickly—you'll get a better job if you brush it on sparingly. If you apply more than one coat, let the first coat dry thoroughly before putting on the second one.

Inside Painting

Make certain your surface is clean. Remove any film of grease or dirt from walls or furniture, especially in the kitchen, for instance. It's a good plan to wash surfaces with soap and water before painting; if you do this, be sure to let it dry first. Smooth your wall surface by plastering holes and cracks, and sandpaper rough places in furniture, before applying your paint.

Most Important of All:-

Let the whole family have a say in settling on your colour scheme. Ask your Sherwin-Williams Dealer to lend or show you his beautiful Paint & Colour Style Guide—it's full of good ideas on decoration and painting.

Use only the best paint, varnish or enamel. Good paint costs so little in relation to long-lasting results obtained; cheap paints only bring you disappointment eventually. Sherwin-Williams Products give you colours that really last and real protection against wear and weather.

Consult your Sherwin-Williams Dealer. He will gladly give you valuable assistance and advice and will supply you with the right Sherwin-Williams Paints for each purpose and the utmost value for your money.

Stalin's Broadcast

When Premier-Marshal Stalin issued his broadcast to the Soviet Union on the eve of May 1st he brought the Russian people a message of profound satisfaction for he was able to tell of the immense strides which the Russian armies have made in the past year and more, dating from the heroic defense at Stalingrad, when the Germans suffered a disastrous defeat, since which time the Russian armies have been engaged in practically unbroken offensives. He could deal with the great scale of Russian liberation for which he praised the correct strategy and tactics of the Soviet command, the good equipment of Russia's troops, the high morale and offensive ardor of the Russian army commander, the first class Russian military technique, the high training of the artillerymen, mortar gunners, tankmen, aircraft, engineers, infantrymen and cavalry and so on.

He said that "a considerable contribution to these successes have been made by our great Allies, the United States of America and Great Britain who are holding the fight against the Germans in Italy and are diverting a considerable part of the German forces from us. They supply us with very valuable strategic materials and armaments and subject to systematic bombing military targets in Germany, thus undermining the military power of the latter."

He spoke of the industrialization of Russia with "new methods" which have led to their lateness and learning the most difficult trades and becoming masters of their jobs. Russia, he said, by the aid of the Premier, who spoke of the self-sabotage of their work in the interest of the front who are courageously bearing all difficulties of wartime and who are inspiring the Red army men, the liberators of their Motherland, to feats of heroism.

"The Fatherland's war has shown that the Soviet people can perform great deeds, can overcome all difficulties, can overcome the most severe trials," he said.

The Russian leader spoke the blow of Fascist states "crushing and tumbling down under the blows of the Russian army, fear and confusion are now remaining among the Romanians, Hungarians, Finnish and Bulgarian allies of Hitler. These Hitler underlings cannot fail to see that German has been completely shattered and "have only one chance of escaping catastrophe—to break with the Germans."

"The German troops now remind one of a wounded beast which is forced to crawl back to the boundaries of Germany—in order to lick his wounds." Then he warned that "a wounded beast does not cease to be a beast, even when he has gone back into his lair."

The task of finishing the task of liberation calls for "common sense, courage and the aid of our troops and from the west by the troops of our Allies. There can be no doubt that only such an aid can bring such as this, which is able to crush finally Hitlerite Germany."

On May Day speech coming as it did at this time of unprecedented bombing of German factories by Britain and United States and after the Russian offensives, the German people can be seen as increasing the jittery of Germany as guessing about the Allied invasion of the continent goes on upon among the German people. Events keep this thought painfully ever present before the German leaders and people. The speech further shows the solid front of the United Nations.

It was when he tried to break into newspaper work on the Los Angeles Herald. Wanting to put as much distance as possible between himself and this unappreciative editor, George rode the roads to New York where he was turned down by a newspaper after newspaper until finally The World, seeing some grotesque hillboards displayed by Harrison for a Coney Island side-show, gave him his first job as a cartoonist.

During his time with the New York paper he created "The Dingbat Family" to whom he devoted more than 25 years of his life. Another brain-child was "Frog Archie and Beans" and other less successful comic strips before "Krazy Kat" began his love life with "Igarna Mouse" and received the offer side of a brick for his bother. It was by constant perseverance that George Harrison became a successful cartoonist and his life will stand as an example for others who have ambitions yet unrecognized.

Half the fathers of the North American continent grew up with "Igarna" and "Krazy Kat," as they were called in the same way as the day they were started upon their India ink lifetime. Little wonder that always have been his his "Igarna" was not matter what the odds might have been will not be forgotten by the public.

West Country Warriors

The Gloucesters, veterans of the gallant regular fighting under General Alexander in Burma, are now reported to be one of our most famous English county regiments, according to correspondents in The Ottawa Journal.

The First Battalion, raised in 1894, became the 28th Foot, and the Second Battalion in 1918 from a second battalion of the Royal East Kent, popularly known as the Buffs, has an almost equally long record in that "Incapable County" of wearing a badge at the back as well as the front of their headbands in recognition of their long service. The Buffs had a fight back-bank. In the case of the First, this was in 1801 at Alexandria, where they were attacked by the French. The Second, in 1918 at the Somme, where they were attacked by the Germans. The Buffs, with no time to form a square, but beat off the enemy standing back-to-back.

Negro Troops Sing in England

(London Daily Mail)

In a Lancaster field at dawn more than 1,000 American colored soldiers faced a cross 12 feet high and heard their choir sing the spiritual "Were You There When This World Was Created?"

Their Easter service, one of many held throughout Britain, was relayed to all parts of the field by police car loud-speakers.

THE UPHILL WAY

Oh, if at times you only doubt
 And fancy further struggle vain,
 Remember none succeeds without
 To victory only through the pain.
 Read in the records left by man
 The tale of triumph, great or small,
 And see that none the worst it can
 To break the will of one and all.

Not one of any art or trade,
 Profession, business, craft or skill
 But doubt and hard and low have made
 The struggle angles against dreamer's will.
 Failure is part of all success.
 Men rise to victory from despair,
 Triumph with seldom come with less
 Than everything a man can bear.

Read through the lives of all you hold
 Most like the one yourself would be
 And you will learn their friends were cold
 To victory only through the pain.
 And there were days of grievous pain,
 Hardship and scorn, and bitter need.
 Time after time the story you can
 To see, determined to succeed.

None knows the outcome! What you seek
 Perhaps beyond your reach may lie
 But no man gains the mountain peak
 Who halfway stops, no more to try.
 But if you quit, you are at right.
 And is within man's power to gain,
 Then work for it with all you might,
 And never call it short vain.

Duty to Salvage Waste Paper

The people of Canada are urged not to let up on their salvage of waste paper. It has been officially stated that the waste paper stock inventory of the mills is still critical and so every Canadian should as a solemn duty see to it that nothing of this kind is wasted or destroyed because it can serve a most important purpose.

Shortage of waste paper might jeopardize the country's whole effort. The paper mills are operating on hand to mouth and require 30,000 tons of waste paper per month. Here is where the home front can do a very important service for the war effort by making sure that nothing of this kind is wasted or destroyed because it can serve a most important purpose.

Paper containers are doing a wartime job. A paper box was just a container designed to convey its contents to destination without cost or leakage. Today the paper containers have gone a step further.

Here is another point—the millions of paper containers sent overseas cannot be returned to the vendor. The duty of Canadians must save all they can of waste paper.

The situation is more critical than ever. The need for more paper containers as well as for other paper products to be used for the war effort is growing daily and the present waste paper supply is wholly inadequate to meet the increased demand.

So the Department of War Services is conducting an extensive paper salvage drive on a national scale.

The Canadian people have done well and the newspapers and magazines of Canada have been ready to respond to the appeal for salvaging of thousands of thousands of tons of waste paper for utilization into the war mode as cardboard.

Rocking Nazi-Held Europe

Here are figures representing something that could never have entered the mind of the authors of the bombing of Germany by the R.A.F. and R.C.A.F. and the United States Air Force. With all the Allied preparation could not have foreseen the future of the air forces of Germany.

It is the fact that the Allied Government and air forces had in mind when they went to Tokyo to operate with bombs.

In the last eighteen days prior to Wednesday, 52,000 tons (estimated) of bombs were dropped on Germany, more than 54,000 planes, which destroyed 888 German planes to a loss of 892 Allied aircraft.

It would be interesting to know where in the long drive upward in the growth of Allied air power, did it pass the German mind and add:

Goering officially set the limit for German production of planes, when the war broke out. Since then Germany, seeing herself overhauled and surpassed, has, in an attempt, endeavored to preserve her aircraft against the threat of the Allies, and also to have made an attempt to increase German production.

And power, then Germany, seeing the United States have the air whip hand over Goering and Hitler.

The Allies' railroad system is suffering from a chaotic condition due to bombings and labor shortage which has compelled the war effort to train of food and fuel.

15-year-old boys, one-armed veterans and women as engineers and crew people. Hitler's bombers and raids and air strikes all over the Continent wherever he gained control must have suffered a terrific diminution.

Spain's New Pact

Spain has seen the wisdom of making an agreement with the British and Americans respecting the shipment of wolfram to Germany. She has agreed to cut to twenty-five per cent of last year's figures the shipment of this metal to Germany, to release Italian merchant ships interned in Spanish waters, put to extinction the distribution of Italian war ships which have been interned and expel the agents of the Axis from Spain and from Tangier.

It has been suggested by the London press that two other loopholes through which Germany have been getting their way to Germany may be closed.

Spain is to get enough oil from the

United States for her own use. Franco of Spain has ever since the time of the Spanish Civil War been on the side of the dictators whence came, German and Italian help to him during the interlude war in the Spanish peninsula. Now what has passed, that German totalitarianism and aggression are bound for a standstill with the triumph over the forces of tyranny.

Surely many Spaniards can see the events of the future making for an Allied triumph.

Who Fights Whom

There are now 33 United Nations and 16 Axis Nations.

Germany is the only Axis Nation at war with all 33 United Nations.

None of the United Nations is at war with all 33 Axis Nations.

Australia is the only United Nation to declare war on Italy.

The Fighting: French are at war only with Germany and Japan.

India and Norway are at war only with Germany.

Brazil, India, Norway, Greece and Russia are the only United Nations not at war with Japan.

The United States is at war with Albania, but not Finland, Great Britain, the United States, and Great Britain are both fighting right out of the war.

There is a difference in which ones.

The Hun Way

In Belgian Limburg Province lives an old Belgian, Armand de Menen de Hume. One of his sons was conscripted by the Germans for periodic activities during the war.

Another son was a pilot in the Belgian Air Force in Great Britain. He was shot down during a raid over Germany.

The father had missed a visit to his home town, St. Truiden, and in Brussels, for the purpose of his son. The German Military Court has just sentenced Armand de Menen to six years of hard labor for having aided his sons.

He gave "the character of anti-German manifestations."

He was given of hard labor for honoring the memory of his sons.

This Modern Stuff

The paradox of modernistic architecture is that it insists that function shall honest—be itself. This modernistic architecture is a thing of its own kind.

It is always heavy and cluttered with sharp edges and lots of glass.

There are modernistic houses which which must be small, cluttered and cluttered.

There are small modernistic houses which which must be large country residences. By the way, modernistic architecture is often hard to tell a college from a church, but the new architectural principles, startling resemblances to a castle, a castle, and a present one.

My mind is sharp and my head: By him is every blimble seen. Which scars the human hood.

His pen reports, and rightly so: What age and fog confess: To him who reads this tale of woe. Are sinful, more or less.

And true it is 'neath skin and pose: Some try to hide their sin. Forgetting old ways through. Through such a covering thin.

But granting what men cannot hide, Still plans it all they do: And what is lost can't be denied. The good is also true.

Though cynics of men's failure think, There merely half-truth lies. Although to depict men sometimes sink, To glorify's the happy day.

So fear the soul of man apart: And find that pain is black and white. There still is in the human heart A glory, much worth while.

60,000 MEN HELPED
... PAID ON BERLIN

IN RAID ON **TEM**
London, July 17.—Nearly 1,000 men were involved in the tremendous task of raiding on Berlin tonight, according to German reports. One aerial commander said, reporting approximately 50 men dropping bombs on the ground. Another five hours of the raid, 4,000 men were found to land. Some 1,000 flying personnel were involved in the raid. The planes used many thousands of gallons of gas, many thousands of gallons of oil and a great deal of hydraulic fluid. The raid was carried out by the German army and navy. Among the advances shown were the use of the new flying suits and the use of 500,000 pounds of bombs.

Day and night our forces are delivering against our enemies the smashing blows that are pounding out the path to victory. The striking at day will give you some idea of the costs of such blows. It does not mention the original cost of the aircraft, of the 2,800 tons of bombs used, nor the cost of the losses inevitably associated with such an attack. Yet, day and night, by land and by air, our smashing blows must be continued until the final victory is won. . . .

That is why we must make sure that there is a never-ceasing flow of supplies, of munitions, of aircraft, and of manpower. That is why it is so vital that you lend your money,

through the purchase of Victory Bonds, to ensure that our forces have the extra power that is needed to assure victory.

There is no safer investment for your money. Victory Bonds are backed by all the wealth and resources of Canada and every dollar you *lend* will be repaid in full, with interest, for Canada has never failed to keep her word.

Welcome the Victory Loan salesman. Give him your order for *more Bonds than have ever before bought*. You will be doing your part to hasten victory. . . . and your Bonds will give you a share in the prosperity that Peace will bring.

Members of Radio Acting group watch efforts of one member with concentrated attention. This is one of forty different activities already launched by R.A.

In single file, skiers of RA ski school under the direction of Dr. Kurt Haas, former Olympic skier, head for practice slopes at Fairy Lake, near city.

This and other activities have proven boon to young people from all parts of Canada who came to Ottawa for war jobs, found city very lonely in free hours.

Under direction of professional dancer, Elizabeth Johnston, RA Dance Classes provided something new in field, with courses ranging from ballet to ballroom. Lack of space restricted classes to 300 members, although nearly 1,000 signed for course. Here ballet group is shown under teacher's arabesque position.

Supporting Victory Loan

In these decisive months all Canada's effort is concentrated on one great object—the attack that is to destroy the Nazi menace and all that it represents. Years of work have gone into the preparation. The best of our young men are staking their lives on its success. We in Canada have, we must give every ounce of help to the Government to be able to continue to send the materials of war which are being shipped and maintain them until the end of the conflict.

To do this Canada is asked that the men of the country, from coast to coast, in man and in the land's lowliest cabin in the wilderness, even the most remote, the girls and women who are in the course of training to join their comrades across the seas in the campaign. The loan their country is asking them to make is not a heavy one. It is the thing that they need most, the thing that they need most, the thing that they need most.

Today, in the spring of 1946, we are being asked to loan our money. It is not the thought of that Canada will not reach the objective, for her people will achieve it since the war is the most important thing in the world. There has never been a time since the war started when it wasn't the most important thing in the world. There has never been a time since the war started when it wasn't the most important thing in the world.

Nothing must be permitted to stand in the way of the outcome, the only outcome that can be achieved. The only outcome that can be achieved is the one that can be achieved. The only outcome that can be achieved is the one that can be achieved. The only outcome that can be achieved is the one that can be achieved.

Canada will not be asked to do more than what is necessary. Canada will not be asked to do more than what is necessary. Canada will not be asked to do more than what is necessary. Canada will not be asked to do more than what is necessary. Canada will not be asked to do more than what is necessary.

That Salvage Paper

Needs in wartime have lessons to teach the people, and one of them is the value of salvage. Waste paper is a case in point. There are many stately ways in which it is that that everyone should know. Waste paper can be used by being thrown overboard, in the case of ships, or by being used for other purposes.

It can provide protection for medical supplies, for food, for clothing, for shelter, for many other things. It can provide protection for medical supplies, for food, for clothing, for shelter, for many other things. It can provide protection for medical supplies, for food, for clothing, for shelter, for many other things.

JUST FOLKS

HERITAGE

Little fellow, you begin
Where old sagas never reached.
Books have gathered wisdom in
They had never taught or preached.
You too from now on, my friend,
Past the ancients' widest dreaming!

Little fellow, you have light
Brighter far than dark of old,
When they walked in darkness,
When they walked in darkness,
When they walked in darkness,

Little fellow, as you go
To your class room, day by day,
You and your companions,
More than all the long-ages play,
Now adorning history's page.

Little fellow, this is true:
There was mystery old
Now is open wide to you,
With its secret fully told.
You have power to change the world,
Wise men once thought past believing!

the worthwhile service it can render. And she who gives all they can of paper not only make for cleanly homes but also something by giving it to the collector. The salvage agency is doing a good turn to the householder as well as a national service of no mean order.

Jet Plane Control

By E. C. Heston, Editor

Pilots decidedly like jet-propelled aircraft. Highly experienced and critical test pilots say they are easily down, very responsive to controls, and the high-speed, rocket power units are so smooth and vibrationless in operation that they prefer them to orthodox types.

Their advantages are many, according to the men who fly them. To begin with, the power produced by jet engines is so great that they can take off in a very short time. There is no transmission, gear or conversion mechanism. Thus the power plant is simplified, weight is considerably reduced, and loss by friction is avoided. Then it does not need high-grade aviation gas as fuel. Paraffin, diesel or jet oil can be used in its stead and so-called "jet fuel" can be used without any loss of efficiency. There is no complicated supercharger, supercharger, and the high-speed, rocket power units are so smooth and vibrationless in operation that they prefer them to orthodox types.

ATTACK COVERAGE PLANS COMPLETED BY NEWS SERVICE

The Associated Press has been ready for invasion With Highly Trained Staff After Months of Preparation

London, May 4. (AP)—The Associated Press has completed its plans for covering the Allied invasion of Europe with an organization of reporters in many more than 100,000 men, the largest of the military from every branch of the service, from the coast to the channel.

Months of preparation have gone into the marshalling of this news force, and when D-day comes, the news of the invasion will be reported by the Associated Press from the front lines.

Leading the AP staff will be a team of correspondents, including the famous war correspondent, Ernie Pyle, who will be in the front lines with the troops.

Present plans call for four men to go to Europe with the first wave of the invasion, and then to be replaced by others as the invasion progresses.

When the invasion begins, the AP staff will be in the front lines with the troops, and will report the news of the invasion as it develops.

Will Facilitate Oil Prospecting

China, May 8.—(CP)—American Minister Cramer announced in the Chinese press today that the United States is withdrawing from an oil prospecting program in the Pacific west, but will continue to maintain a presence in the prospecting oil-bearing areas by other interests will be facilitated by the Chinese government.

Within the oil field developed at Herman Wells, N. W., was too far away to supply the needs of Central China and particularly the Szechwan province. There is reason to believe that favorable structures may also be found in the vicinity of great Slave Lake, close enough to justify the construction of a pipeline to the south," the Minister said.

The Minister will have a one-third share in the development of the proven field at Herman Wells, which will be developed by Imperial Oil Ltd., a Canadian company, in a joint operation. The United States government will be given an option to purchase, for its own use at cost plus 20 cents a barrel, an amount up to one-half of the oil recovered from the proven area, not exceeding 30,000,000 barrels.

The company may include in the option to the United States the right to purchase 10 per cent of any oil found in the area covered by exploration permits until a total of 50,000,000 barrels is reached, including oil from the proven field.

The United States War Department had spent about \$24,000,000 on the Chong project, which included a pipeline from Herman Wells to a refinery at Wintabow, Taiwan territory.

Lord Hartington Weds U.S. Girl

London, May 8.—(CP)—Lord Hartington, 38, and Patricia Kennedy, 24, daughter of Joseph P. Kennedy former United States ambassador to Britain, were married today at St. Charles, reader of St. Paul.

Lord Hartington, heir to the Duke of Devonshire, recently was designated as a government official for the Commonwealth. Miss Kennedy has been a resident in Britain since she came this shore last summer.

The civil ceremony was performed by Brigadier Frederick Streat and witnessed by the Duke of Devonshire, father of the bridegroom, and J. C. O. J. Joseph Kennedy, Jr., brother of the bride.

Bonairlaw

Bonairlaw — A successful union was held on Wednesday evening of last week at the home of Mr. and Mrs. Chas. Gordon under the auspices of the Hydrobrook Women's Institute, Bonairlaw group. Seven tables of progressive dining were played, the prize going to Mrs. Wilson Campbell and Mr. Frank Chas. At the close of the game, a lunch was served after which an orchestra composed of Mrs. Neil and Ray McLean furnished music for some square and round dancing.

Mrs. W. E. Shattuck, president of the W. T. thanked Mr. and Mrs. Gordon for the use of their home.

Hundreds of Awards To 14th Air Force In Chinese Theatre of War

Bombardiers in China May 8.—(AP)—Hundreds of awards have been made, some posthumously, to men of the Fourteenth Air Force under Major Gen. Chieh K. Chen, who is operating in this theatre. The awards included four Silver Stars, 30 Distinguished Flying Crosses, the Soldier's Medal, the Air Medal, the Purple Heart and Oak Leaf Cluster. Many of the men received more than one award.

PROOF OF THE TROUS IN THE CATCHING OF D. A. HARRIS killed poultry when he was about a pecked rooster that had got away and broken his leg. Mr. Harris procured a net and later in the day landed a rooster measuring 17 inches and weighing 11½ pounds. His first hook was embedded in its mouth.

PUT VICTORY FIRST

*We
must nourish
the Fight...*

THE assault is on! Nothing must be held back for everything is at stake. And as the fight reaches new climaxes of fury, it becomes ever more important, in Churchill's expressive phrase, to "nourish the fight". We must keep more and more supplies flowing to our fighting fronts... supplies which are now being used up on a greater scale than ever.

Don't let us fail this lifeline of supply. Let us give our fighting men everything... guns, ammunition, equipment... endless supplies in overwhelming quantities in order to smash the enemy by sheer weight of metal and weapons... and thus to help save lives.

Each and every one of us must ask himself "Am I doing all I can to nourish this fight? With renewed realization of the task before us, with new determination to see it through, let us pledge ourselves to buy all the Victory Bonds we possibly can.

*Nourish—and finish—the fight
by buying more Victory Bonds!*

A Huge Raft of Timber Is Towed by Tiny Tug

By W.H. COLCLOUGH
 Vancouver
 (The Associated Press)

"That's a Davis raft," explained the skipper as he pointed to a small tugboat in the distance. "It's towing a raft of timber." The tugboat was a small, dark-hulled vessel, barely visible against the vast expanse of the water. The raft it towed was a massive, rectangular block of timber, stretching for miles across the water's surface. The tugboat was moving slowly, its wake churning the water behind it. The raft was composed of many individual logs, tightly packed together. The tugboat's crew was visible on its deck, and it appeared to be in good control of the massive load. The scene was a testament to the power of small vessels in the logging industry.

A man by the name of Davis says he has been in the business of towing such rafts for many years. He went to the tugboat and spoke to the skipper, who told him that the raft was being towed to a mill. The skipper said that the raft was made of logs from the Coast Range, and that it was being towed to a mill in the Puget Sound area. The skipper also mentioned that the raft was being towed by a tugboat named the "Davis". The skipper said that the raft was being towed to a mill in the Puget Sound area, and that it was being towed by a tugboat named the "Davis".

To building a Davis raft, says the skipper, it takes about five weeks. The logs are cut in the forest, and then they are loaded onto a barge. The barge is then towed to the mill, where the logs are unloaded. The logs are then cut into planks, and then they are loaded onto a raft. Century

Century — An unique social evening was held at the Century Club on Thursday evening. The admission fee was that each member bring two guests, made from old material. One fee landed and one fee for her head. The guests were later sold and were by those present, and the evening was a success.

A short program consisted of a speech given by Douglas MacArthur, piano solo by Mrs. MacArthur, and a vocal solo by Mrs. Perry. The program was a success.

The ladies served a dainty lunch at the club, and a social hour was enjoyed.

Mrs. H. H. H. and Mrs. A. A. A. were the guests of honor. The program was a success.

Sea-Power of Dominions

Growth of the navies of the Dominions of the British Empire in the present struggle is a tribute to the courage and resourcefulness of the peoples of the Dominions. Canada stands third among the Allied navies while the fleets of the Dominions have a combined strength of about two thousand vessels and 118,000 men, of which Canada's is composed of about 500 ships and 10,000 men.

Britain being a worldwide empire whose bonds are the bonds of the seas and of the air, it is but natural that the Dominions separated so widely in different parts of the globe should develop along the line of the Motherland in sea power and communications.

What they have done in the war can be told only when the war is over and the full account can be given.

This growth of naval power by the Dominions of the Empire in part due to the fostering of the Dominion navies as a venture for them. Canada and Australia now build destroyers in their home shipyards and in practically all the Dominions and in India naval requirements for sloops, corvettes and smaller vessels have been met in part by the output of local shipbuilders.

Canada is in the good company of the Argentine and New Zealand in the South African Navy and the Royal Indian Navy.

These fleets have been a bulwark for the support of the Empire. The story of this development is one of the most inspiring in the history of the Empire.

A Super-Gestapo

There is said now to be in operation in Germany and occupied Europe, a super-Gestapo, ready to carry out the most drastic deeds for which it was created—to conduct mass roundups, to extend the reign of terror, to suppress the resistance. The Gestapo has earned the most hated name of organizations in the modern world. It is a brutal organization, the agents perform the deeds of darkness and death without a tremor of a muscle, so cold and hardened that the most atrocious acts associated with this body. None but one who is a hater of mankind can possibly belong to this organization, which sums up and represents the evil that is in German Nazism and Hitlerism.

This body has done the most terrible work in Germany and in the overrun territories for more than the four and a half years of the German conflict. Its performance is the worst it can do in the hands of Hitler most needs all the villainy and crime in the world to try to win him and the despicable and desperate system of tyranny of which he is the head.

Under the underground of this force of Hitler's and Himmler's General von Worch's will meet an obstacle which will make the supreme test with the Gestapo. The Gestapo has been working underground has been carrying on a ceaseless sabotage of the German war effort and when the war is over, it approaches it will throw its full force against Hitlerism and give its whole-hearted service to the cause of the overthrowing of the enemies of mankind. The Gestapo, the aggressor, dare not do without this inhuman creature. He has to put his trust in criminals.

Romanian Oil

One of Hitler's satellites, Romania, is losing an important part of its value to Germany as the bonds are tightening upon that country and the Nationalist regions of air and land threaten the whole of Hitler's ill-gotten gains. Russian armies are in Romania. The Fleet of the Black Sea which have meant so much to Hitler's war machine have suffered heavy losses. Allied bombers have shattered communications and the flow of materials so necessary for the war machine of the Romania which have been reduced to about twenty per cent of Germany's needs have been reduced in output three quarters.

This diminution of the oil so essential to Hitler in a most critical time is thought by General Eisenhower, Allied commander of the Mediterranean likely to be a disastrous effect upon the enemy war machinery. General Eisenhower says that the plants to show how effectively

the Allied raids are cutting off the much-needed oil from the armored machinery of the German forces.

Million Books Lost

The body appealing for books for the service to make good the million lost in a recent raid is the Ministry of Supply, Directorate of Salvage and Recovery, says The Manchester Guardian. The "book recovery and salvage campaign" was since its opening in October, 1943, largely through local "drives," but also through the system by which the public can hand gifts unwrapped over post office counters. About a million a month go to the forces, which include the Merchant Navy and the Women's Services. Others go to bomb-damaged public libraries, and those cannot be used for either of these destinations are repurposed to make millions.

Ancient Riches Dug Up

Treasures 3,000 years old in the form of Celtic antiquities have come into the possession of the National Museum of Wales in Cardiff. Last year, 90 iron and bronze implements were unearthed from the ruins of the Iron Age hill-fort of Maidenhead. The collection, revealing the most advanced Celtic civilization, 100 B.C. to 500 A.D., includes war weapons, pieces of cart wheels, iron tools, harness parts of war chariots, bars of currency, objects of religion, a sickle, a section of a bronze horn, and a number of captives, the strength and quality of which was proved by a knacker driver, who used one to drag the ruins of the hill-fort. The hill-fort, the Celts were overwhelmed here by the legions of Rome in A.D. 61.

Victory Bill Will Ring

George Narrook, sergent of the parish church at St. George's, England, is looking forward to the day when he will ring the bells for the victory. He is just as one of his ancestors rang it after Queen Elizabeth's victory over the Spanish Armada in 1588. Five centuries ago Narrook was given the section's post and a long line of descendants bearing his name have held the job ever since.

Seven Freight Trains

(Globe Staff, March 28)

One Small man, commenting on the fact that 24 freight trains were dropped a total of 7,000 tons of bombs on Germany and German-occupied France.

That is equal to the load carried by seven Algoma Central Railway freight trains.

That gives some idea of the tremendous mass of explosives which has been dropped on the German Reich since the beginning of the war.

A week's bombing equal to the load of destruction to the enemy installations in Germany and in the overrun territories for more than the four and a half years of the German conflict. Its performance is the worst it can do in the hands of Hitler most needs all the villainy and crime in the world to try to win him and the despicable and desperate system of tyranny of which he is the head.

CORNER CONVERSATION

Who takes them in and brings them out?
The Navy!
Who makes them Hitler do with-
out them?
The Navy!
Who sinks the subs and sweeps the
Keeps open all the traffic lines.
And feeds the Army when it dines?
The Navy!

Who does the fighting on the shore?

The Army!
Who'll lead the March to Tokyo's door?
The Army!
When ships have fired their final blast,
And planes their last few bombs have cast,
What force will win the war at last?
The Army!

Who gets there first on sea and land?

The Marines!
Who's "blowing" him in hand?
The Marines!
Who likes the going with it's tough?
And knows of being "pleasy tough"?
And has what it takes, enough?
The Marines!

Decide this argument you could?
Other than say: All three are good!

CHILD'S SULKY SPELLS WORRIED HER UNTIL...

For the first time in her life, a mother was worried by her child's sulkiness. The mother of a three-year-old boy, who has been suffering from a severe case of sulkiness, writes to the editor of the Ottawa Citizen, asking for advice.

Use for a box of traps sent to him to trade with the boys in a sulkiness hospital in Italy.

Fitting into the picture were the main forces in the Mogaing Valley and near Mogaing heading down Japanese attacks in the Pori Hsu valley in their double-barrelled push to the south against Mogaing and Myittha. These latter forces are closing in on the Japanese 18th Division which already is reported as being disorganized.

The Chinese forces, supported by tanks and artillery, have been attacking strong Japanese positions east of the main Mogaing valley road and south of the Irawa river headquarters said.

Chinese Losing Grip on Vital Honan Rail Line

Chungking, May 10 (AP)—Chinese forces have all but lost their grip on the north-south Peiping-Hankow railway in Honan Province, the Chinese High Command indicated today.

Two strong Japanese columns were reported less than 14 miles from a junction as they struck from the south from Chumai and entered the railway town of Suiping from the north. The invaders from Chumai were said to have gained several miles, appreciably shortening the 140-mile run.

The Japanese seemed to be making a sudden push toward the town of Luoyang, Province of Henan. The Japanese, however, were said to have been checked east of the Yi River. The nearest Japanese forces several days ago were reported only about 10 miles from Luoyang.

Planes of the 14th United States air force strafed columns and key points, but this only partly balanced the goods against the ill-equipped Chinese who have yielded a large slice of the richest wheat-growing area of China since the invaders began their offensive April 18.

ON FRONT PAGES AGAIN
Birmingham —(CP)— Two year ago 21-year-old Mrs. Evelyn Miller set up a world record by turning out 6,550 shell parts in a day. Then she married a munitions worker and now has made the front page of the London papers again by becoming the mother of twins.

Appeal to Allies For Quick Help

CONGRUENT, May 10 — (AP)—Heard by the Allies for quick help to the Chinese in suffering of the Chinese Army and people, who on June 7 enter the eighth year of war, was made today by the Counselor of the Chinese Legation in Washington, Executive Yuan, Chang Ping-Ku. "If the Chinese soldiers have suffered the necessary weapons they cannot win better," he said in a statement. "The Chinese Army and people have made, and are making, great sacrifices, the spokesman added, declaring that "It is high time the Allies should call a halt to their suffering by helping us win the war sooner through an increased supply of armaments."

IF YOU HAVE MONEY IN THE BANK READ THIS

MR. T. H. DREDGE
Manager of Bank of Montreal

MR. C. C. JEWELL
Manager of Canadian Bank of Commerce

MR. I. G. HEFFKY
Manager of Royal Bank

MR. B. C. SIEGLER
Manager of Dominion Bank

These are the bank managers serving the City of Belleville and District. Their business is to advise you properly in financial matters. Perhaps you bank with one of them.

Perhaps you look on that bank account of yours as the one reserve you have to meet emergencies.

They suggest—and recommend—another. **VICTORY BONDS.**

They know the danger of inflation. They know the danger of idle dollars. They know the financial needs of the Country. They know that there never has been a time when the Dominion of Canada bonds have not been readily convertible into cash—that they are always acceptable as security for bank loans.

This is WAR... and our dollars must fight too.

They respectfully suggest that you purchase Victory Bonds to the limit of your ability—out of earnings—and WITH YOUR BANK DEPOSITS.

For financially responsible people, they even stand ready to help finance a larger purchase than may be possible out of savings at the present time—by lending them the money for a period of six months, at the same interest as carried by the bonds.

There are only two days left in the Sixth Victory Loan Campaign. Go to the bank where you conduct your business and place an application or an additional application for the maximum amount. Let your conscience be your guide.

Needless to say, every tea consumer in Canada will welcome the increase in the TEA ration and will lose no time in resuming some of the pleasant habits he was wont to enjoy in pre-ration days.

What a treat it will be for the tired housewife to have her tea again in the mid-morning or afternoon when its delicious refreshment means so much to her.

You may depend on it, to the best of our ability, every grocer in Canada will be kept supplied with a fresh stock of delicious SALADA to meet these added needs.

Suddenly Peg began to tremble. Anthony said she was not. The Chapman wife rose, the eye men in white who, he always said, were on the scene.

He looked at the night air. The house was dark. The light was in the hall. The door was open. The light was in the hall. The door was open.

Anthony said, "I'm—anybody knows" and the man himself went into the dark living room and started toward them. It still had not been said that unknown shadow.

Judge Dismisses Federal Indictment Against Chaplin

U. S. District Judge J. P. O'Connell has dismissed a federal indictment against Charlie Chaplin.

Chaplin was indicted on charges of obscenity and immorality. The judge found that the evidence was insufficient to sustain the charges.

The judge's decision was a surprise to many. Chaplin had been charged with the same offenses in the past.

Chaplin's defense team had argued that the charges were unfounded. The judge agreed with them.

The judge's decision was a victory for Chaplin. He was free to continue his work.

Chaplin's return to the United States was a major event. He had been in Europe for several years.

Chaplin's work has been praised by many. He is considered one of the greatest comedians of all time.

Chaplin's decision to return to the United States was a bold move. He was taking a risk.

**Do What Your
Doctor Does If
Child Is Listless**
Babies who are listless or who do not eat or sleep well are often suffering from a condition known as "infantile indigestion." This is a common ailment of infants and is usually caused by an over-feeding or by the mother's diet. The best remedy is to consult a doctor who will advise on the proper diet and feeding schedule for the child.

FARMERS NEEDED HELP!

Canadian farmers for five years have responded splendidly to Canada's urgent need of food. This year the need is greater—and workers available on the farms are even fewer.

City, towns and village folk must help the farmer to give the food we need.

For our Armed Services—
For our home population—
For the United Nations—
For rescued peoples.

If you can spare your holidays, or odd days, or even half days to assist farmers, don't fail to do so this year. If you can take steady work on a farm, by all means do so.

Your services in the farming industry are this year vitally necessary to victory.

Six Canadians Among Those Who Die in Germany

Eden Informs House Incident Occurred At Prison Camp Near Dresden

BY ALAN BONDAL

(Canadian Press Staff Writer)
London, May 19. (CP Cable) — Forty-seven R.A.F. officers were shot by the Germans after a mass escape from a prison camp near Dresden last March 22, Foreign Secretary Eden informed a shocked House of Commons today, and The Canadian Press learned six were Canadians.

Names of the Canadians were sent to Ottawa for release after next-of-

Under wartime conditions living costs could rise so fast that your expenditures just couldn't be kept within your income. In order to aid the control of the family "outgo"—a ceiling is set on prices.

To make the ceiling stick, costs of production—including salaries and wages—are controlled

rationing helps fixed prices by seeing that need—not money—determines distribution

3 Youths Saved From Cataclyc

Chicago, Ill., May 25 (CP) — Three youths were rescued from a house-cataclyc that minutes before it plunged over Niagara Falls.

The boys—John Probst, 17; Joseph P. Smith, 17; and Michael Swales, 16—were taken to their homes by police. They had been trying to swim from the island to the shore, but were caught by the current and thrown into the falls.

The boys were rescued by a tugboat which was passing by at the time. The boys were taken to the shore and are now being treated for their injuries.

HOW MUCH SOUP CAN A BOMBER CARRY?

TEN times as much if the soup has been dehydrated and compressed. One four-motored bomber can carry enough dehydrated and compressed soup for 500,000 servings—a half-million bowls of soup!

Dehydrated and compressed foods when carried by ship provide a saving of 90% in shipping weight and up to 50% in bulk. Today, when cargo space is still at a premium, this method of preparing foodstuffs for overseas simplifies and speeds the delivery of larger quantities of food than might otherwise be possible.

Today, all the billions of eggs shipped abroad from this continent are dried, all milk going to Britain is dried. Meat, potatoes, carrots, onions, beans, cabbage are also dehydrated. These foods when re-

hydrated retain their appearance, flavor and most of their vitamin values.

Dehydrated food packages may be air-proof and moisture-proof. Many packages now being successfully shipped from this continent use a laminated material partly from moisture-proof "Cellophane" or depend upon "Cellophane" specially treated with wax resins compositions. Thus, "Cellophane", developed for peacetime use, serves the United Nations by helping provide proper packaging for vitally important dehydrated and compressed foods.

"Cellophane" retains film for packing foodstuffs under conditions of low humidity Canada and air alike.

HOW CAN HELP CANADA HIS CRITICAL WAR EMERGENCY

150,000 TONS OF WASTE PAPER ARE NEEDED EVERY MONTH!

● Today, Canada faces a critical shortage of waste paper urgently needed for war purposes. Waste paper is essential to the production of ammunition, paper parachutes, maps, sun helmets and hundreds of other items. It is a vitally important raw material for the making of paperboard containers, millions of which are required to ship medical kits, rations, shoes, tanks and airplane parts and innumerable supplies of all kinds overseas. Meet this critical paper shortage with every scrap of paper you can!

WHAT IS WANTED
You can remedy this critical paper shortage by saving every scrap of waste paper, mainly wrapping paper—score bags—cardboard—envelopes—correspondence and old magazines and books—envelopes and loose-leaf scraps. These represent the raw material for making vitally needed paper for consumers.

HOW TO DO IT
The security is in the mill. (This little line you take will save thousands of man hours.)—Then dispose of it through our local voluntary Salvage Campaign, or other War Voluntary Organizations, or sell it through any known trade channels, your pedlar, dealer or others. The important thing is to get your Waste Paper moving to the mills.

WASTE PAPER IS AN ESSENTIAL WAR MATERIAL! SALVAGE ALL YOU CAN!

Empire Day and the Schools
These are inspiring days, days in which the progress of victories that will mold the course of history for all time. All that the United Nations have and are being poured into the crucible of war for the salvation of mankind from German atrocity and selfishness.

No one can feel the momentous of these times more keenly than the hundreds of thousands of pupils in the schools of Canada for they see how young men and women are having a world cause to fight that the future generations of mankind will be determined by the events of the coming year.

At the Province of Ontario, have been marking this "Empire Day" those things which make a people great. They are learning many things in a day which inspires them in the lessons of patriotism and sacrifice. In the morning the program sent out by the Hon. George A. Drew, Minister of Education, for Empire Day children to be in the schools to rejoice in the courage and valor of our young men and have come together to show their pride in the British Empire. They are an object lesson in citizenship for it shows how and in what ways men and women and boys and girls can serve their Dominion and their Empire. Everything that is best and noblest for Canadians is on trial and will stand the test.

Empire Day is the day when the story of international relations and their impact upon every citizen can be told and the spirit of their Empire and their Dominion are performing for humanity's sake.

These boys and girls in schools are the heart to the new world and all that it means. No pupils have been more knighted and in many respects the present day are more keenly interested than were their fathers.

They are the heirs of all the ages up to this great hour of world preparation to battle for liberty.

Empire Day is a great day in the history of the younger citizens of Canada as it unfolds the lessons of national life.

French Fun in Italy
The name of the French is appearing prominently in the news.

Their successes against the Germans. What this must mean to the people of France can be estimated for they are not only helping to win battles but are at the same time lifting the morale of the French four years under the oppressor Hitler.

France has every reason to hate the German people who have twice in little more than a half decade overthrown France and made her bear all the sorrows of war and invasion.

Thirty years ago France was made the battleground by the Huns, who escaped largely. This time it is still the case with France and all of it is the oppressor, but Germany has been suffering from war thanks to the mighty aid of the British, Americans and Russians. At this time the French people have the additional impelling force making them hate the Huns and that Germany had made advances and gained support through Vichy collaboration. Frenchmen will remove that stain from the fair name of France by doing as the French forces are doing in Italy, defeating the enemy.

Meanwhile the spirit of France must be rising steadily with the tide turned against the Huns everywhere. There can be no greater joy to French hearts than to welcome the day when they will see the defeated enemy brought to bay and defeat.

France's fall in 1940 was one of the saddest events of the war for France stood

for liberty. The world will fight for her such a recovery that she will take her place among the nations and rise to her former glory.

French forces in Italy are truly at work for the reconstruction of their country, which means the destruction of German tyranny and threat to the peace of France and other nations.

Poles Help Defeat Huns
Polish troops are fighting in Italy, thereby fighting against their oppressor in Poland who are now in the freed areas and working with the Russians.

It goes. The people that Adolf Hitler crushed because he wanted to deprive Germany are having their innings now and to come. The underground movements of Europe will be seeing the sign of opportunity to smite the Germans.

Poles have a deep joy in crushing their oppressor who thought themselves invincible and who acted with the utmost cruelty and savagery.

Poles, whose country was the first victim on the actual outbreak of war in 1939 must have a supreme joy in driving the Huns in Italy the men of the race who sell themselves up as mastersmen and who now are showing that Huns can feel when the impulse moves them as they have done in the past.

With fighting Poles go the wisest of humanity and the common sense of the world place as fighting men.

Invasion Shoulder-Flash
Inspiration guided the brush of the artist who designed the shoulder-flash being worn by all officers and non-commissioned officers of the British Commonwealth.

Representing the darkness of Nazi oppression, the flash is the symbol of the liberation in the form of a crusader's sword, the flames arising from the hill and the beating up of the world. This represents avenging justice by which the enemy power will be broken in Nazi-dominated Europe. Above the flash is the letter "H" for Hitler, which is the symbol of the Allied are compared.

The chief of state (blue) above the rainbow is emblematic of a state of peace and tranquility, and the rainbow is the symbol of the United Nations.

His wearing appears to be restricted to the Allied invasion high command, but we suspect that eventually all troops will be in the great liberation will be allowed to wear it, in some form or other, as a mark of high distinction. They will all be worthy of it.

Monty's New Caravan
(Crew Vehicle No. 1)
Montgomery, designer of caravans and Second Front. The new caravan which has been built by war-workers in their spare time as a gift to General Montgomery is now ready to his own design.

Judging by photographs it is again simple in design and equipment, resembling a motor-driven horse-box. There are two compartments, a bed-room with a tie-up bunk, portable table, wash basin and book-shelf, and a lounge with comfortable chairs and dining table, which can be quickly converted into a conference room.

His decisions will probably be taken by the research and other objectives of the Montgomery command. The caravan is a personal service establishment for the general which may in some respects resemble the motor-driven horse-box which was built at Thurston, near Leeds, England, for the general's use in the field.

Initial cost of the research installation is estimated to be about £20,000, but it is probable that it will cost more than £20,000, about £10,000 and the research installation is estimated to be about £20,000.

THE CHIEF
The executive officer wears a rainbow band. But the chief the fellow who runs the thing.

He's boss of men from deck to the hold. -So, boy, in his presence secure your lip.

The chief has hash marks on his sleeve. And bitter words on the end of his tongue.

His master, boy, from the time you leave -Till you're back in port and your last bell's rung.

The chief has the salt of the sea in his hair. His eyes are as sharp as a gull's in flight. According to him, he's been everywhere.

He may be old, but he still can fight. He is wise to sailors; tricks he knows. If you think to fool him, he'll prove you wrong.

When the chief gives an order, my boy, it goes! So do as he says and you'll get along.

Chinese Forces Cut Old Burma Road at Cenang

Chinese forces have cut the Burma Road at Cenang, only 30 miles from the Indian border, according to a report from the Chinese government. If you are thinking of your savings, you must ask yourself where you can invest your funds safely and probably so that they will be returned to you fairly, every day, every year. The best way to gauge the outlook for insurance in your time is to look at its record in the past.

in 1914
At the outbreak of the Great War, the price of most securities doubled. But the measured values of Green-West Life policies did not drop one cent.

in 1921
The post-war depression knocked the bottom out of security prices. The bondholders' and policyholders' in retirement receiving guaranteed incomes from the Green-West Life, were regularly paid in full just as all there had been no depression.

in 1933
In 1933 the man who owned real estate or a share in any business, could have obtained only fractions of 1929 prices. But the guaranteed value of his Green-West Life policy did not change.

in 1939
The outbreak of the second World War again upset the market for the funds of the man who had in 1939 received the value of his Green-West Life insurance policy.

Through many wars and depressions, Life insurance has proved itself to be the investment which the average man can rely. Wherever there is a year's interest on your Green-West Life policy in force. They will never let you or your family down.

Price Ceiling Set on Berries

On May 23 (CP)—The Ottawa Board announced today that it has decided to raise the prices for Canadian-grown strawberries and raspberries at a level which is 25 per cent above the prices of these commodities last year but higher than the prices of the same berries in 1955.

It will be the first time these berries have been phased under a price control system since 1947.

Strawberries will be sold at 50¢ per bushel, while prices will apply from May 29 to Sept. 30, with season reduction in strawberry prices to 40¢ per bushel after Sept. 30. The drop when picking is at the peak of the season. The price of raspberries and raspberries imported from June 8 to Sept. 30, and puts the price of these berries at the same level as Canadian-grown berries in this season.

In the price schedule, Ontario and Quebec berries are placed in zone 1. Highland berries are placed in zone 2 and zone 3 up to the 100th meridian. The price differential to the consumer is considerably more than the difference in the prices for raspberries and strawberries. The berries usually are sold in the same season.

Producers may sell direct to consumers or to retailers at prices up to 10 per cent above the price of the board.

Growers and shippers will be required to file their prices with the board.

Hamilton Board of Control Orders Fire Inquiry

Hamilton, May 30. (CP) — A Board of Control study of fire insurance and building department orders today — a move to guard against any future disaster like the flash fire which raged through the Moore Hotel last Wednesday killing six persons and injuring 16 others, some seriously.

Mrs. Helen Winters, 36, widow of one of the fire victims, was placed on the Hamilton General Hospital's

"critical" list early today. She is suffering from burns over most of her body. Aids from Mrs. Mable Clark, 21, the others most seriously injured, held their own or suffered slightly, according to reports.

It was feared the death toll might be as high as 25, as a result of the fire which broke out as people were preparing to leave the Moore Hotel last Wednesday.

Almost immediately after the first cry of "fire" flames cut off the only stairway in the hotel. The men got out that way, the other dancers jumped or were pushed through windows 30 feet above the street. Most of them were burned by flames which poured into the second-floor dance hall.

C.D.S.—THE STORE FOR YOUNG CANADA HAILS THE HIGH SCHOOL FARMER

A young army moves forward... Forward to wage war against weeds... to create harvest among potato bugs. Forward to cut down weeds and spray and pack... Forward to man tractor T-7, in field work... to see in the hot sun.

Canadian students, students who for the freedom-farm boys who fight in Italy, assemble this summer on a farming force. A force whose objective is food... food measured in millions of eggs... in tons of butter... in seas of grain. Food to feed the fellow countrymen, to accompany invasion.

C.D.S. The Store for Young Canada, feels a very real respect for such fighters. They solve them one and all... against youngsters who pick in a hard job with the same roving enthusiasm they lend to sports men or ruling states.

*It's up to every hu-
man to do its part.*

WHAT IS WANTED

You can remedy this critical paper shortage by saving every scrap of Waste Paper, namely: wrapping paper — store bags — cardboard — cartons — corrugated board — old magazines and books — envelopes and letters — newspapers. These represent the raw material for making vitally needed Paper containers.

HOW TO DO IT

Tie securely in separate bundles. (The little time you take will save thousands of man hours.) *Then* dispose of it through your local Voluntary Salvage Committee or other War Voluntary Organization, or sell it through any known trade channels, your pedlar, dealers or others. The important thing is to get your Waste Paper moving to the mills.

9th Army Attacks German Lines

5th Army Smashing Last Defence Line South of Rome

Allied Headquarters Announce Progress Of Roaring Battle As Satisfactory

MOVE THROUGH ARCE

By HOLLAND NORDGAARD
(Associated Press Staff Writer)

Naples, May 30. (AP)—With 9th Army infantry and tanks, after repelling a German counter-attack, the 5th Army smashed again today at German defenses between the hills of Arce and the Volturno River. The German line would hold no more than a few days, it was expected.

The German offensive started yesterday night off Arce, Italy, and moved southward along the Volturno River. The 9th Army, which had been fighting at the Volturno River, moved northward from three sides and broke through the German line. CHAPTER 2

A short while later a wall of fire rolled into the driveway and the fire alarm rang. The firemen were in the house in a matter of minutes. The fire was a steady stream of smoke. The fire was a steady stream of smoke. The fire was a steady stream of smoke.

Two or three hundred people of my town were the weather and their family connections. The fire was a steady stream of smoke. The fire was a steady stream of smoke. The fire was a steady stream of smoke.

When other names hadn't been mentioned, it occurred to me suddenly that all of the people, the fire was a steady stream of smoke. The fire was a steady stream of smoke. The fire was a steady stream of smoke.

When I realized who Gals had said, she said to me, "You're a cat!" I said to her, "You're a cat!" I said to her, "You're a cat!" I said to her, "You're a cat!"

When I realized who Gals had said, she said to me, "You're a cat!" I said to her, "You're a cat!" I said to her, "You're a cat!" I said to her, "You're a cat!"

When I realized who Gals had said, she said to me, "You're a cat!" I said to her, "You're a cat!" I said to her, "You're a cat!" I said to her, "You're a cat!"

When I realized who Gals had said, she said to me, "You're a cat!" I said to her, "You're a cat!" I said to her, "You're a cat!" I said to her, "You're a cat!"

I had a nightmare...

- I dreamed that I paid \$5.00 for a haircut and \$50.00 for a pair of cardboard shoes. I dreamed that we had no wartime controls on prices, profits or wages, and that we hadn't had the sense to organize the distribution of supplies all the while the line...
- I dreamed that because everyone was making more money and spending it, prices were skyrocketing.
- all the stores looked like "fire" sales... with people scrambling to buy before prices went still higher.
- panicky people were buying things they didn't need; and hoarding everything they could get their hands on...
- I dreamed that everybody had to fight to get more money... and that in this mad race, wages and salaries were falling behind.
- I dreamed the hand of everyone was against his neighbour, with each of us blaming the other for his troubles.
- with everybody for himself... no matter what it cost in the long run... and no matter how it hurt the war effort.

THEN...THANK GOODNESS—I WOKE UP!

THE HANDS WE PUT TOGETHER

- to realize with relief that I live in a country where things are sane and stable... where the cost of living has been kept within bounds.
- to realize that prices and wage—production costs and selling prices—are inseparably linked together.
- to remind myself that the danger is still pressing and that we must continue to hold firm... and that means everybody must play fair and do his part by not trying to get some temporary, fabled advantage at the expense of his fellow-Canadians.

This advertisement is the work of a series being issued by the Government of Canada to emphasize the importance of preventing further increases in the cost of living and inflation later.
